Leads a large software engineering R&D team funded by government research agencies. Enables scientists and engineers as a manager, architect, scientist, and developer. Builds cutting-edge tools that advance the state of the art in automating software development and builds open-source software with demonstrated adoption by the research community.

Professional

GrammaTech **Ithaca, NY**
Director of Automated Software Engineering *2018 – present*
Support GrammaTech's research division building up staff, expertise, frameworks, prototypes, funding, and IT infrastructure. Research and develop tools and techniques advancing the boundaries of automated software development and reverse engineering.

- Propose and manage government funded R&D projects in tens of millions of dollars.
- Manage technical team of 20 including scientists, software engineers, and test engineers.
- Lead the Machine Programming and Binary Rewriting research areas:
  - Machine Programming covers programmatic analysis, transformation, and generation of software artifacts to automate common software engineering tasks.
  - Binary Rewriting covers programmatic analysis and transformation of software binaries to improve security and efficiency giving developers and users control over their binaries.
- Leverage techniques and technologies to solve research problems:
  - Formal methods and Logic Programming for efficient enumeration and synthesis.
  - Evolutionary Computation techniques for open-ended optimization.
  - Machine Learning to accelerate formal and heuristic search and generate software artifacts.
- Maintain and grow IT infrastructure, improve engineering efficiency.
  - Continually refine and improve internal software engineering standards.
  - Motivated and supported company-wide transition to Git and adoption of CI/CD.
  - Managed refactoring of multi-decade old C/C++ code base from monolith to modular.
  - Built research department's public website `https://grammatech.github.io`.
- Research and develop tools to automate software (reverse) engineering, including:
  - GTIRB/DDisasm, ecosystem of binary analysis and rewriting tools.
    `https://grammatech.github.io/prj/gtirb`
  - SEL, source code analysis and transformation.
    `https://github.com/grammatech/sel`, `https://pypi.org/project/asts/`
  - Mnemosyne, automated software development assistant.
    `https://grammatech.gitlab.io/Mnemosyne/docs/`
  - MergeResolver, automated merge conflict resolution as a GitHub Action.
    `https://mergeresolver.github.io`
  - SSR, AST-aware Software Search and Replacement and automated software refactoring.
    `https://grammatech.github.io/prj/ssr`
  - Binary Editor, VSCode extension for binary analysis and interactive binary rewriting.
    `https://grammatech.github.io/prj/gtirb-vscode/`

Senior Scientist *2014 – 2018*

- Contributed to the following research and development efforts:
  - Applied formal methods to build provably-secure N-variant systems from COTS binaries.
  - Applied evolutionary techniques to evolve *exact* C decompilation of COTS binaries.
  - Applied evolutionary techniques to automatically repair flaws in COTS binaries.

University of New Mexico **Albuquerque, NM**
Research Assistant *2009 – 2014*

- Research and develop evolutionary techniques for software maintenance and improvement.
- Empirical and theoretical investigation of biological properties of software.

Counsyl **Palo Alto, CA**
Open Source Software Consultant *2010 – 2011*

- Used open-source software to automate technical document generation.

The MITRE Corporation **McLean, VA**
Senior Artificial Intelligence Engineer *2005 – 2009*

- Lead developer of the Rapid Argus Modeling for Biosurvalience Operations (RAMBO) system. RAMBO provided disease modeling and surveillance supporting $\sim$ 50 biosecurity analysts.
- Prototype the STAT (Statistical Tracking and Analysis of Text) temporal text analysis system.
- Systems administration for production Unix/Linux systems.

International Technical Analyst *2004 – 2005*

- Research assistant, composed documentation and user manuals.

Volunteer

Planned Parenthood **Pittsburgh, PA**
Clinic Escort *2019 – present*

National Poor People's Campaign
Web Designer *2020 – present*

GNU Emacs
Contributor *2009 – 2014*

- Developed Emacs Org-mode's facilities to embed executable source code into documents.

Education

University of New Mexico **Albuquerque, NM**
Ph.D., Computer Science *2014*
Advisor: Stephanie Forrest

Kenyon College **Gambier, OH**
B.A., Mathematics, Minor Philosophy *2004*

Skills

Programming languages: Lisp, Python, JavaScript, C++, OCaml, Haskell, Ruby, Prolog
Technologies: Emacs, Git, Docker, K8, Linux, SMT/SAT, AI/ML, LaTeX, HTML/CSS
Domains: Programming Languages, Software Engineering, Binary Analysis
Clearance: Top-Secret (active)

Publications

Doctoral Thesis

Eric Schulte. *Neutral Networks of Real-World Programs and their Application to Automated Software Evolution*. PhD thesis, University of New Mexico, Albuquerque, USA, July 2014. `https://cs.unm.edu/~eschulte/dissertation`.

Patent

Eric Michael Schulte and Antonio Enrique Flores Montoya. Systems and/or methods for generating reassemblable disassemblies of binaries using declarative logic, 2020. US010705814B2.

Refereed Conference Publications

Antonio Flores-Montoya and Eric Schulte. Datalog disassembly. In *29th USENIX Security Symposium (USENIX Security 20)*, 2020. Distinguished Paper.

Vineeth Kashyap, Jason Ruchti, Lucja Kot, Emma Turetsky, Rebecca Swords, David Melski, and Eric Schulte. Automated customized bug-benchmark generation. In *2019 19th International Working Conference on Source Code Analysis and Manipulation (SCAM)*, pages 103–114. IEEE, 2019. Distinguished Paper.

Deborah Katz, Jason Ruchti, and Eric Schulte. Using recurrent neural networks for decompilation. In *Software Analysis, Evolution and Reengineering (SANER), 2018*. IEEE, 2018.

Eric Schulte, Jonathan Dorn, Stephen Harding, Stephanie Forrest, and Westley Weimer. Post-compiler software optimization for reducing energy. In *Proceedings of the eighteenth international conference on Architectural Support for Programming Languages and Operating Systems*, ASPLOS '14. ACM, 2014, *Acceptance Rate: 22.6%*.
